ABOUT ME

I'm passionate about full-stack development and software engineering, with skills in Python, JavaScript, HTML, CSS, and both REST API and database technologies. Besides programming, I enjoy keeping up with tech trends, gaming, and gardening. I love tackling challenging projects that help me improve my skills. My main goal is to create innovative solutions that have a positive impact on society. I'm excited to plan projects, solve problems, and enhance performance as I continue to learn and innovate in the tech industry.
